**Bifen 7.9F Select™** is an odorless, non-irritating to skin, non-phytotoxic residual insecticide that will give you superior, long lasting control. The active ingredient, bifenthrin, not only has a wide range of pests controlled but is approved in key indoor and outdoor areas such as residential, industrial, commercial and food-handling areas. For prevention and control of termites, carpenter ants and other pests of structures. Controls listed pests in and around homes, commercial and industrial buildings, recreational areas, athletic fields, lawns, ornamentals, and greenhouses.

- Controls pests in livestock and poultry houses
- Controls a wide range of insects and mites on trees, shrubs, flowering plants, non-bearing fruit and nut trees, and flowers
- Controls pests indoors and outdoors on residential, institutional, public, commercial, and industrial buildings, and lawns, ornamentals, parks, recreational areas, and athletic fields
- For use in interiorscapes including hotels, shopping malls, and office buildings
- For use in outdoor plantscapes including residential dwellings, parks, institutional buildings, recreational areas, athletic fields, and home lawns
- Prevents and controls termites in and around structures and constructions
- Prevents and controls ticks (including ticks that may transmit Lyme disease and Rocky Mountain Spotted Fever)
Application Information:

Horticultural Applications
Bifenthrin 7.9F Select™ is effective for use on a broad range of insects and mites on trees, shrubs, leafy plants, nonbearing fruit and nut trees, and flowers grown in greenhouses. It may also be used on interior plants found in hotels, shopping malls, office buildings and other similar areas. Bifenthrin 7.9F Select may be used by itself or in a tank mix with other products such as insect growth regulators.

Turf Applications
Bifenthrin 7.9F Select can be used as a broadcast treatment on turfgrass for control of many insects including armyworms, cutworms, chinch bugs, ants and ticks. Bifenthrin 7.9F Select may be applied at up to 1 fl. oz. per 1,000 square feet at the discretion of the applicator. Maximum residual control requires the higher treatment rates.

Pest Control On Outside Surfaces And Around Buildings
Bifenthrin 7.9F Select may be used to control Ants including Carpenter Ants and Fire Ants, Armyworms, Bees, Beetles, Biting Flies, Boxelder Bugs, Centipedes, Chiggers, Chinch Bugs, Clover Mites, Crickets, Cutworms, Dichondra Flea Beetles, Earwigs, Elm Leaf Beetles, Firebrats, Fleas, Flies, Gnats, Grasshoppers, Hornets, Japanese Beetles, Midges, Millipedes, Mosquitoes, Moths, Roaches (including Cockroaches), Scorpions, Silverfish, Sod Webworms, Sowbugs (Pillbugs), Spider Mites, Spiders (including Black Widow Spiders), Springtails, Ticks (including Brown Dog Ticks), and Wasps.

Food Handling Establishments
If used as a general spot, surface, or crack and crevice treatment, Bifenthrin 7.9F Select may be applied in both food/feed and nonfood areas of food/feed-handling establishments. Food/feed-handling establishments are any place other than private residences where exposed food/feed is held, processed, prepared or served, including areas for receiving, storing, packing (bottling, boxing, canning, wrapping), preparing, enclosed processing systems (dairies, edible oils, mills, syrups) of food and edible waste storage. Serving areas where food is exposed and the facility is in operation are also considered food areas. Nonfood areas in which applications are allowed include entries and vestibules, floor drains (to sewers), garages, garbage rooms, lavatories, locker rooms, machine rooms, mop closets, offices, and storage (after canning or bottling).

Livestock And Poultry Buildings And Kennels
Bifenthrin 7.9F Select may be used as a surface spray (including directed spray) and crack and crevice application for control of flies, fleas, beetles, bed bugs, mites and ticks. Usual cleaning of the structure must be completed along with the Bifenthrin 7.9F Select application for effective control.
