GENERAL INFORMATION
Indicator Blue SG Select is a non-toxic, water soluble colorant that can be used either as a pond dye or a spray pattern indicator. The super concentrated soluble granular formulation is easy-to-use and dissolves quickly. Color intensity may be adjusted by gradually increasing or decreasing the recommended application rate as needed.

DIRECTIONS FOR USE
As spray indicator: Apply Indicator Blue SG Select as a tank mix with pesticides, herbicides, fungicides, fertilizers or other liquid treatment. Mix 1 - 2 ounces per 50 gallons of spray solution to cover 1 acre. Thoroughly agitate to ensure uniform dispersion.

As a pond dye: Indicator Blue SG Select is suitable for use in most lakes, ponds and ornamental water features that have little or no outflow. Pour the granules into the water at several locations. Apply upwind at 5 ounces per acre of water. Natural water movement will disperse evenly throughout the water body.
