

EC GROW

Broadleaf Weed Control

Award Turf Fertilizer with Trimec combines three active ingredients together to control over 200 broadleaf weeds. This balanced formula of 2,4D, MCPP-p and Dicamba attacks both common and hard-to-control weeds directly to the root. Labeled for use essentially anywhere nuisance weeds grow, Award Turf Fertilizer with Trimec assures proper weed control while providing essential plant nutrients.

The active ingredients in Trimec need to be absorbed by susceptible plants in order to be effective. For best results, mow one to two days before application. Water lightly or apply in the morning for proper adhesion to plants.

Partial List of Weeds Controlled:

Chickweed	Clover	Carpetweed
Curly Dock	Dandelion	Buttercup
Ground Ivy	Knotweed	Henbit
Daisy	Oxalis	Pigweed
Plantain	Ragweed	Spurge
Shephardspurse	Thistle	Plantain

And other listed weeds.

Our Award Turf Fertilizer with Trimec products contains 1% Iron for deep greening:

- 22-0-5 30% PCSCU 1% Fe w/Trimec**
- 25-3-3 20% PCSCU 1% Fe w/Trimec**

Always refer to the actual product label for complete instructions and Directions of Use. Trimec is a trademark of PBI Gordon, Inc.
