March 10, 2021

Dear Valued Customers:

Over the past seven years we have done all we can to absorb price increases from our suppliers, during that time we have only passed on a five percent increase. Unfortunately, due to the rapid rising costs of materials and manufacturing we will be increasing our prices. Effective April 10, 2021 Action Machining, Inc. will increase list price by 10% on most of our products. This increase includes all filters, manifolds and specialty products Action Machining Inc. manufactures. It will NOT include any hand pumps (HP-1, HP-2 & DAP-2) or the drill pump (DDP). You can get your new pricing by dividing your current pricing by .90.

All current discounts and payment terms will remain the same. Thank you for your continuing support of Action Machining, Inc. and our products.

Sincerely,

A handwritten signature in black ink that reads "Dee Zesiger". The signature is written in a cursive, flowing style.
